

Prepared on: 30/05/25

This Product Highlights Sheet is an important document.

- It highlights the key terms and risks of this ILP Sub-Fund and complements the Fund Information Booklet ("FIB") and Product Summary ("PS").
- It is important to read the FIB and PS before deciding whether to invest in the ILP Sub-Fund. If you do not have a copy, please contact us to ask for one.
- You should not invest in the ILP Sub-Fund if you do not understand it or are not comfortable with the accompanying risks.
- Please speak to a representative of either Prudential Singapore or a distributor duly appointed by Prudential Singapore if you wish to invest in the ILP Sub-Fund.

Product Type	ILP Sub-Fund ¹	Launch Date	1 June 2023

PRULink Global Growth Fund (the " ILP Sub-Fund")

¹ For ILP Sub-Fund that feeds into an underlying fund, some of the information provided below could be similar to the underlying fund.

ILP SUB-FUND SUITABILITY				
 WHO IS THE ILP SUB-FUND SUITABLE FOR? The ILP Sub-Fund is <u>only</u> suitable for investors who: Seek capital appreciation; and are comfortable with the volatility and risks of a fund which invests globally. Investors may wish to speak to a Prudential Financial Consultant or Representative before making a commitment to invest in the ILP Sub-Fund. 	<u>Further Information</u> Refer to Sch $2(d)$ – <i>Product Suitability</i> of the FIB for further information on product suitability of the ILP Sub-Fund			
KEY FEATURES OF THE ILP Sub-Fund				
 WHAT ARE YOU INVESTING IN? You are investing in an ILP Sub-Fund which invests into United CIO Growth Fund which seeks to provide investors with capital growth by investing globally. 	Refer to Sch 2(b) – Investment Objective of the FIB for further information on features of the ILP Sub-Fund.			

	Investment Strategy	
		Refer to Sch $2(c)$ –
0	The ILP Sub-Fund and the Underlying Fund share the same investment strategy. The Underlying Fund aims to achieve its objective by investing primarily in	Investment Strategy of the
	companies which shall be incorporated in, listed in, traded or dealt globally. The Underlying Fund may be exposed to these companies by investing in Underlying Entities such as funds, ETFs or REITs. The Underlying Fund may also invest in equity, equity-related securities, bond or debt instruments of these companies directly.	FIB for further information on Investment Strategy.
0	The Underlying Fund will typically allocate 80% of the Underlying Fund's NAV in Equity Underlying Entities and 20% of the Underlying Fund's NAV in Fixed Income Underlying Entities, with a deviation of 20% for each asset class. In extreme market conditions, severe market stress or disruptions, or if there are no suitable investment opportunities, the Underlying Fund may temporarily hold up to 40% of its assets in cash and/or cash deposits, money market instruments and/or short-term debt securities.	
0	FDIs may be used for the purposes of hedging, EPM, optimising returns or a combination of such purposes.	
0	The Underlying Fund is actively managed without reference to its benchmark (as set out in the Prospectus), which is used as a reference for performance comparison purposes and to provide market context. The benchmark is neither used as a constraint on how the Underlying Fund's portfolio is to be constructed nor set as a target for the Underlying Fund's performance to beat.	
	Parties Involved	
W.	HO ARE YOU INVESTING WITH? <i>Prudential Assurance Company Singapore (Pte) Limited:</i> the Product Provider. <i>Prudential Assurance Company Singapore (Pte) Limited:</i> the Manager of the ILP Sub-Fund. <i>UOB Asset Management Ltd:</i> the Investment Manager of the Underlying Fund <i>United Overseas Bank Limited:</i> the Investment Adviser of the Underlying Fund <i>Citibank N.A.:</i> the Custodian of the ILP Sub-Fund	Refer to Sec 2 – The Product Provider and Sec 3 – The Manager, the Investment Manager and the Investment Adviser of the FIB for further information on roles and responsibilities of these entities and the PS for what happens if they
		become insolvent.
	KEY RISKS	
Th	HAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the ILP Sub-Fund may rise or fall. These risk factors may cause you to the some or all of your investment:	Refer to Sec 5 – Risks on the FIB for further information on risks of the ILP Sub- Fund.
	Market and Credit Risks	
0	You are exposed to market risks, including those in emerging markets – Prices of the securities that the Underlying Fund invests in may be affected by changes in economic conditions, interest rates and the market's perception of the securities, which in turn may affect the value of your investment.	Refer to Sec 5 – Risks on the FIB for further information on risks of the ILP Sub- Fund.
	Emerging market investments may involve risks different from the established markets, including increased risk in the following areas: nationalisation; social, economic and political uncertainty; dependence on exports; volatility in the securities markets and currency exchange rates; inflation; government control on foreign investment and repatriation; economic intervention by governments; accounting and corporate governance; less regulation of the securities markets; longer settlement periods for securities transactions; less reliable clearance and custody arrangements.	
0	You are exposed to equity risks – The ILP Sub-Fund or Underlying Fund invests in stocks and other equity securities that historically have greater price volatility than bonds and other fixed income securities. This in turn may affect the value or volatility of the Underlying Fund or Underlying Fund.	
0	You are exposed to debt securities risks – Adverse changes in the financial condition of the issuer of bonds invested in, or in general economic conditions, or both, or an unanticipated rise in interest rates, may increase the potential for default by the issuers of these securities. Interest rate fluctuations may affect the price of a bond. A change in the credit rating of a bond as a result of any of the above factors can affect that bond's liquidity and therefore have an impact on the value of your investment.	

0	You are exposed to foreign exchange / currency risk – Where investments are denominated in a currency that is different from the currency of denomination of the Underlying Fund, fluctuations of the exchange rates of such currencies against the currency of the Underlying Fund may affect the value of Units. The Investment Managers may hedge the foreign currency exposure of the Underlying Fund and may adopt an active or passive currency management approach. Foreign currency exposure may not be fully hedged depending on circumstances of each case, including the outlook, hedging costs and market liquidity of the relevant currency.	
	Liquidity Risks	
0	The ILP Sub-Fund is not listed and you can withdraw your units only on Business Days. There is no secondary market for the units in the ILP Sub-Fund. All withdrawal applications should be submitted to the Product Provider. The liquidity of the Underlying Fund may be limited if a significant portion of the assets of the Underlying Fund is to be sold to meet redemption requests on a short time frame. During this period, the portfolio allocation may be modified to prioritise liquidity.	Refer to Sec 5 – Risks and Sec 10 – Suspension of Dealing of the FIB for further information on risks and suspension of dealing of the ILP Sub- Fund.
0	You may not be able to perform a withdrawal of units during any period where dealing is suspended. Your right to withdraw units may be temporarily suspended under certain circumstances.	
0	You are exposed to liquidity risks – Investments by the ILP Sub-Fund and Underlying Fund in some Asian and/or emerging markets often involve a greater degree of risk due to the nature of such markets which do not have fully developed services such as custodian and settlement services. There may be a greater degree of volatility in such markets because of the speculative element, significant retail participation and lack of liquidity.	
	Product-Specific Risks	
0	You are exposed to derivatives risk – Investments in FDIs are subject to risks associated with FDIs including leverage risk and short sale risk. An investment in a FDI (including foreign exchange forward contracts and equity index future contracts) may require the deposit of an initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. Therefore, it is essential that investments in FDIs are monitored closely. The Investment Managers have controls for investments in FDIs and have in place systems to monitor the FDI positions of the Underlying Fund.	Refer to <i>Sec 5 – Risks</i> on the FIB for further information on risks of the ILP Sub- Fund.
0	You are exposed to risks associated with Underlying Entities – The Underlying Fund is indirectly exposed to risks associated with its Underlying Entities, including:	
	- no control over how third-party managers make investments or whether they will act in accordance the representations made by them;	
	 the Underlying Fund's NAV may be affected or delayed by issues in the valuation of the Underlying Collective Investment Schemes; 	
	- the Underlying Fund may invest in FDIs, which may amplify a gain or loss, potentially earning or losing substantially more money than the actual cost of the FDI;	
	- the Underlying Fund will bear indirectly fees charged by the managers and other service providers of its Underlying Collective Investment Schemes;	
	 each strategy employed by the Underlying Collective Investment Schemes typically will involve a different set of complex risks, many of which are not described in the Fund Information Booklet. 	
	u should be aware that the Underlying Fund and Underlying Fund may be posed to other risks of an exceptional nature from time to time.	

	FEES AND CHARGES	
WHAT ADD T	HE FEES AND CHARGES OF THIS INVESTMENT?	
Fees payable dire	Refer to Sch $2(g)$ – Fees	
You will nee	of the FIB for full details	
investment su	on the fees and charges
